

Graduate Profile

NeoCity Academy

Identity

Students understand their strengths and areas for growth and opportunity.

Students have an understanding for self and others

Students can put their strengths to use in order to impact learning outcomes

Students can identify opportunities for growth in their work through self-reflection

Students know how they learn and use this knowledge to improve learning outcomes

Ideation + Creation

Students think deeply to produce better ideas and eventually create better outcomes.

Students work with peers to develop and improve upon their ideas

Students create original solutions to problems by testing, launching and refining

Students conduct research and use multiple (re)sources to seek solutions to their problems

Students leverage all resources to improve the creation process

Innovating Without Limits

Students continuously push their thinking to generate, develop, and communicate new ideas.

Students apply a growth mindset to continue to improve their work

Students reflect on their work to improve future outcomes

Student ideas are challenged by their peers

Students are able to stand, deliver and defend their ideas

Students apply design thinking (continuous innovation) to their learning outcomes

Passion + Purpose

Students apply their learning to affect change.

Student learning outcomes will have an impact in their community (or world)

Student learning outcomes are driven by interest through student agency in the learning process

Students understand the purpose to the work that they engage in during the learning process and outcomes

Student learning outcomes are ready for a global audience
